Downloading

Please refer to the following link on the Exclaimer website:

<http://www.exclaimer.com/signature-manager-exchange-edition/download>

Installing

Download the 'Signature Manager Exchange Edition 2.0.0' installation file 'setup.exe' and run on the Microsoft Exchange Hub Transport Server and or Microsoft Exchange Client Access server (Exchange 2013 only). An MSI is available from support by contacting support@exclaimer.com.

Uninstalling

Uninstall can be achieved via the 'setup.exe' or MSI for the currently installed version of

'Signature Manager Exchange Edition 2.0' or via 'Add/Remove Programs' in Windows Server 2003 or 'Programs and Features' in Windows Server 2008 & 2012.

The configuration files are located in the following folder and will not be removed as part of the uninstall process:

Operating System	File Location
Windows Server 2003 R2 x64	\Documents and Settings\All Users\Application Data\Exclaimer Ltd\Mail Disclaimers
Windows Server 2008 x64 Windows Server 2008 R2 x64 Windows Server 2012 Windows Small Business Server 2008 Windows Small Business Server 2011	\ProgramData\Exclaimer Ltd\Mail Disclaimers

The uninstall process will not lose any of your configuration or settings. However as a backup precaution you may wish to export your configuration.

Export Steps

1. Open the Exclaimer Console.
2. Select the 'Exclaimer' node.
3. Open the 'Action' menu.
4. Select 'Export Configuration...'
5. Select a location and filename for the export.
6. Press Save.

This will export all your settings including all your templates and licensing data.

Upgrading

Upgrading from Mail Disclaimers 1.0 to Signature Manager Exchange Edition 2.0.0 can be achieved via the 'setup.exe' which will perform an in-place upgrade.

Important:

When upgrading from Mail Disclaimers 1.0 to Signature Manager Exchange Edition 2.0.0 the product will go into trial mode. You will need to obtain a new license for Signature Manager Exchange Edition 2.0.0 from the Exclaimer Sales team.

New Features

- In-place upgrades. No need to uninstall the previous version.
- Copy and import template data from other Exclaimer products.
- Convert Plain Text messages to HTML before applying signature.
- Ability to remove any previously attached vCards.
- Ability to trigger policy conditions and populate template data using either the SENDER or FROM parts of a message.
- Ability to stop processing policies if a policy exception is encountered.
- New "Conditional Field" component.
- New "List of fields" component.

- New "Social media strip" component.
- New "QR Code" component.
- New "Personal Block" component.
- New "Address Block" component.
- New "Other User's AD field" component.
- Nested {fields} can inherit the properties of their parent.
- General performance and scalability improvements.

Changes

- Status View has been removed and all operational events are now logged in the 'Exclaimer' Windows event log under 'Application and Services Logs'.
- Email notifications removed. Notifications are now recorded in the Windows event log.
- Image button in the template editor now uses {Custom Image} field.
- Hyperlink button in the template editor now uses {Custom Hyperlink} field.

Fixed Issues

- When using the LDAP Query editor in Conditions/Exceptions on the Advanced tab the entire LDAP query was not exposed.
- Dynamic Distribution Group cached information was not refreshed on expiry.
- Bullet points displayed incorrectly in certain scenarios.
- Using "Content from File" with an RTF document could occasionally cause repeated content to appear.
- First 3 characters of a Japanese message in RTF were malformed when using Japanese Windows XP and Japanese Office 2003.
- Messages without a 'From' address, but with a 'X-Sender' header would not be processed.
- Messages with Sender: or From: field missing, empty or containing only <> would not be processed.
- Encrypted messages that triggered a policy with an embedded image would not be processed.
- Table components always had their merge cells option disabled.
- Configuration backup failed in certain scenarios.
- Importing and Exporting configuration files did not clear them from the temp folder.
- The folder selected for image and file location when importing multiple templates was not being retained.
